Thank you to our foremen in the field and every employee who has helped to complete these jobs. Masters Electric appreciates your hard work! 😊😊

Project Spotlight

IDEA EWING HALSELL

IDEA Ewing Halsell is the 5th IDEA School that we have built and the 2nd with D. Wilson Construction. IDEA Ewing is also 30% larger than any other IDEA School in the San Antonio Area. IDEA Ewing along with IDEA Najim was the 1st of the IDEA Schools to implement the new 2015 IECC lighting standards that are now being enforced by the City of San Antonio. All the hard work that went into IDEA Ewing resulted in D. Wilson's making recommendations to the Owners that they use Masters Electrical for IDEA Mays Phase II which commenced work this past Monday.

We would like to thank Roberto Fraire Sr. for his professionalism and hard work and all Masters Team Members that have and will work on this project. Please realize the history involved in the project and take pride in your part of it. We also want to thank D. Wilson Construction and their team members, for giving Masters Electrical Services LTD. the opportunity to work on this project.

Employee Spotlight

Employee of the Month

Rene Jones

Rene Jones has been employed by Masters Electrical Services, LTD since August 2014 and is currently a Pre-fab technician.

Rene currently resides in San Marcos with his girlfriend, Erica, of 10 years. He was born and raised in Karnes City and still makes frequent trips to his home town to visit his mother and nine year old sister. This past year Rene graduated with his bachelor's degree in Resource and Environmental Study's from Texas State University. Rene's hobbies are hunting and fishing. He also enjoys cooking. He prefers Texas country music most and Cody Johnson is his favorite country singer.

Rene Jones is an asset and we are looking forward to his continued employment here at Masters Electrical Services, LTD.

Safety News

Keeping eye protection effective

Introductory comment – Eye protection needs to be maintained to remain effective. This session will show you six ways to make sure eye protection will save your eyes when you need it.

Meeting Starter Questions – What eye protection devices do you use on the job, and how do you maintain them properly? When did you last check the condition of your protection devices? Have you ever suffered or witnessed an accident and injury resulting from poorly maintained eye protection?

Critical Safety Points – Although protective eyewear is designed to guard against such accidental injuries as impacts from sharp objects, it will not withstand repeated impacts indefinitely from sharp objects, it will not withstand repeated impacts indefinitely. To keep these devices in working condition, remember to:

- **Inspect them regularly** for scratches, cracks or other wear and replace them if they are scratched, bent or uncomfortable. Scratches can weaken the lenses and reduce their resistance to impact.
- **Replace glasses** when lenses are scratched, broken, bent or you cannot see through them easily for any reason. Obstructed vision can open up a whole new array of potential accidents and injuries. Try to see around a scratch or crack in a safety glass lens is often listed as a major cause of machine and vehicle operation accidents and injuries. Eyewear can protect your eye but you need unobstructed vision to protect your entire body.
- **Clean lenses** after every use with soap or mild detergent and water or with special solution designed for that purpose. Never use abrasive soaps, rough paper or cloth towels. These will scratch and damage your equipment, avoid any rough handling.
- **Store your eye protection** equipment in a clean, dry place where it cannot fall or be stepped on. Keep it in the case when you're not wearing.
- **Disinfect eyewear** if it's contaminated by a hazardous substance or if it's been worn by someone else.
- **Replace knotted, twisted worn or stretched goggle straps.** You won't get the all-round protection goggles are designed to provide if they don't fit properly and snugly.

From Human Resources

401(k) Changes:

As most of you may know by now, we are recently transferred our 401(k) retirement plan from Lincoln Financial to Transamerica. The transfer should be in full effect by mid-May. You can now enroll or login to your account at www.ta-retirement.com for account balances, changes to contributions or beneficiaries, and enrollment options. To be eligible for our plan, you must have worked for our company at least 1 year and must be at least 21 years old. Now is a good time to review your investment options and beneficiary information.

If you have any questions regarding your 401(k), eligibility or changes, please contact Alyssa at 830-303-6330 or go online to www.ta-retirement.com for more information.
